<b>General Advice:</b>	For advice contact the National Poisons Centre on 0800 POISON (0800 764 766) or a doctor immediately. Begin artificial respiration if the victim is not breathing. Use mouth to nose rather than mouth to mouth. Obtain medical attention.
<b>If inhaled:</b>	Move the victim to fresh air immediately. If breathing is irregular or stopped, administer artificial respiration. Keep patient warm and at rest, in a position comfortable for breathing. Call a Doctor or the National Poisons Centre immediately.
<b>In case of skin contact:</b>	Take off all contaminated clothing immediately. Wash off immediately with plenty of water. If skin irritation occurs, get medical advice. Wash contaminated clothing before re-use.
<b>In case of eye contact:</b>	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses (if present). Immediate medical attention is required.
<b>If swallowed:</b>	If swallowed seek medical advice immediately and show the container or label. DO NOT induce vomiting.
<b>Important symptoms and effects, both acute and delayed:</b>	
<b>Symptoms:</b>	Nonspecific No symptoms known or expected.
<b>Indication of any immediate medical attention and special treatment needed:</b>	
There is no specific antidote available. Treat symptomatically.	

## Section 5: FIRE-FIGHTING MEASURES

<b>Extinguishing media:</b>	
<b>Suitable extinguishing media:</b>	Small fires: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Large Fires: Alcohol resistant foam or water spray.
<b>Unsuitable extinguishing media:</b>	Do not use a solid water stream as it may scatter and spread fire.
<b>Special hazards arising from the substance or mixture:</b>	
<b>Specific hazards during fire-fighting:</b>	As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health.
<b>Advice for firefighters:</b>	
<b>Special protective equipment for firefighters:</b>	Wear full protective clothing and self-contained breathing apparatus.
<b>Hazchem Code:</b>	2X
<b>Further information:</b>	Do not allow run-off from fire fighting to enter drains or water courses. Cool closed containers exposed to fire with water spray.

## Section 6: ACCIDENTAL RELEASE MEASURES

**Personal precautions, protective equipment and emergency procedures**

Refer to protective measures listed in Sections 7 and 8.

**Environmental Precautions:**

Prevent further leakage or spillage if safe to do so.  
 Do not flush into surface water or sanitary sewer system.  
 If the product contaminates rivers and lakes or drains inform respective authorities.

**Methods and material for containment and cleaning up:**

Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).  
 Clean contaminated surface thoroughly.  
 Clean with detergents. Avoid solvents.  
 Retain and dispose of contaminated wash water.

**Reference to other sections:**

Refer to disposal considerations listed in Section 13.  
 Refer to protective measures listed in sections 7 and 8.

## Section 7: HANDLING AND STORAGE

**Precautions for Safe handling:**

**Advice on safe handling:**

Avoid contact with skin and eyes.  
 When using do not eat, drink or smoke.  
 For personal protection see section 8.

**Conditions for safe storage, including any incompatibilities:**

**Requirements for storage area and containers:**

Keep containers tightly closed in a dry, cool and well-ventilated place.  
 Keep out of reach of children. Keep away from food, drink and animal feeding stuffs.

**Further information on storage stability:**

Physically and chemically stable for at least 2 years when stored in the original unopened sales container at ambient temperatures.

**Specific end use(s)**

**Specific use(s)**

For proper and safe use of this product, please refer to the approval conditions laid down on the product label.

## Section 8: EXPOSURE CONTROL / PERSONAL PROTECTION

**Control Parameters**

**Occupational Exposure Limits:**

Components	CAS No	Value type (form of exposure)	Control parameters	Basis
isopyrazam	881685-58-1	TWA	1 mg/m <sup>3</sup>	Syngenta
dipropyleneglycol monomethylether	34590-94-8	TWA	100 ppm 606 mg/m <sup>3</sup>	WES
		STEL	150 ppm 909 mg/m <sup>3</sup>	WES

**Exposure controls**

**Engineering measures:**

Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated.  
If airborne mists or vapors are generated, use local exhaust ventilation controls.  
Assess exposure and use any additional measures to keep airborne levels below any relevant exposure limit.  
Where necessary, seek additional occupational hygiene advice.

**Personal Protective Protection:**

**Eye protection:**

Face shield or tightly fitting safety goggles.  
Always wear eye protection when the potential for inadvertent eye contact with the product cannot be excluded.

**Hand protection:**

**Material:**

Waterproof or chemical resistant, such as nitrile rubber

**Break through time:**

>480 min

**Glove thickness:**

0.5 mm

**Remarks:**

Wear protective gloves. The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other.  
Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves.  
Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. The break through time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

**Skin and body protection:**

Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place.  
Remove and wash contaminated clothing before re-use.  
Wear as appropriate:  
Impervious protective clothing.

**Respiratory protection:**

When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.  
Suitable respiratory equipment:  
Respirator with a half face mask  
The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used.

**Filter type :**

Combined particulates and organic vapour type (A-P)

**Protective measures:**

The use of technical measures should always have priority over the use of personal protective equipment.  
When selecting personal protective equipment, seek appropriate professional advice.  
Personal protective equipment should be certified to appropriate standards.
